

# LOOKLIVE

## UI / UX DESIGNER JOB DESCRIPTION

Looklive is the leading platform that helps you shop what your favorite celebrity or influencer is wearing. You can buy the exact item, or the more affordable option. Looklive empowers people to shop the world's biggest cultural moments. We believe that by blending content and commerce, you give people a more seamless, fun, shopping experience.

Given Looklive's extraordinary growth, our backend team faces a variety of challenges ranging from API development to platform engineering. If you want to start fast and take on problems like these with a high degree of independence, then we want to talk to you.

### What We're Looking For:

- Design new experiences. You'll guide the creation process: Seek out creative, design-led solutions to challenging problems
- Apply UX fundamentals to lead the full design process and translate concepts into wireframes and mockups that lead to intuitive user experiences for a wide range of devices and interfaces
- Craft the brand's identity. People will make their first impressions of us based on our brand. You'll work with the entire team to enforce a consistent aesthetic and an authentic voice across all our user touchpoints: social media, email newsletters, and more.
- Define interaction models, user task flows, and UI specifications, and apply expert stakeholder management skills to communicate scenarios, end-to-end experiences, interaction models, and screen designs to stakeholders

### Skills We're Looking For:

- A portfolio with examples of email, web and or other digital design content.
- Experience using Sketch and Adobe Creative Suite
- Create wireframes and interactive prototypes
- Demonstrated communication skills and you can articulate your design decisions
